

How to setup your KW5262 VDSL Modem

Step 1: Log in to KW5262

- Open a web browser and type in <http://192.168.31.1/> in the address bar and press Enter.
- If it prompts you for a username and password, enter ***admin*** (all lowercase) for both.

Step 2: Enter VMedia credentials

MODEM SETUP

Wide Area Network (WAN) Service Setup

Choose Add, Remove or Edit to configure a WAN service over a selected interface.

Interface	Description	Type	Vlan8021p	VlanMuxId	Igmp	NAT	Firewall	Remove	Edit
ppp0	pppoe_0_0_35	PPPoE	N/A	N/A	Disabled	Enabled	Enabled	<input type="checkbox"/>	Edit

Add Remove

- In the Home screen, on the left hand side, click on **Advanced Setup** >> **WAN Services**
- Click **Edit**

Step 2: Enter VMedia credentials (continued)

VMEDIA

MODEM SETUP

- Device Info
- Advanced Setup
- Layer2 Interface
- WAN Service**
- LAN
- NAT
- Security
- Parental Control
- Quality of Service
- Routing
- DNS
- DSL
- UPnP
- DNS Proxy
- Interface Grouping
- IPSec
- Certificate
- Multicast
- Wireless
- Voice
- Diagnostics
- Management
- Reboot

PPP Username and Password

PPP usually requires that you have a user name and password to establish your connection. In the boxes

PPP Username: @dev.vianetdsl.com

PPP Password:

PPPoE Service Name:

Authentication Method: **AUTO**

MTU [88-1492] :

- Enable Fullcone NAT
- Enable NAT
- Enable Firewall
- Dial on demand (with idle timeout timer)
- Use Static IPv4 Address

- Enter your username and password in the **PPP Username** and **PPP Password** field respectively. You should have received your username and password with the installation confirmation email.

Step 2: Enter VMedia credentials (continued)

The screenshot shows the VMedia modem setup interface. On the left is a navigation menu with the following items: Device Info, Advanced Setup, Layer2 Interface, **WAN Service** (highlighted in red), LAN, NAT, Security, Parental Control, Quality of Service, Routing, DNS, DSL, UPnP, DNS Proxy, Interface Grouping, IPSec, Certificate, Multicast, Wireless, Voice, Diagnostics, Management, and Reboot. The main content area is titled "PPP Username and Password" and contains the following text: "PPP usually requires that you have a user name and password to establish your connection. In the boxes". Below this text are several input fields: "PPP Username:" with a text box containing "username" and "@dev.vianetdsl.com" to its right; "PPP Password:" with a text box containing "....."; "PPPoE Service Name:" with an empty text box; "Authentication Method:" with a dropdown menu set to "AUTO"; and "MTU [88-1492]:" with a text box containing "1492". Below these fields are five checkboxes: "Enable Fullcone NAT" (unchecked), "Enable NAT" (checked, with a blue arrow pointing to it from the right), "Enable Firewall" (checked, with a blue arrow pointing to it from the right), "Dial on demand (with idle timeout timer)" (unchecked), and "Use Static IPv4 Address" (unchecked).

- Make sure you check:
 1. Enable Firewall
 2. Enable NAT
- Scroll down and click **Next**

Step 3: Save the settings

The screenshot shows the VMedia modem setup interface. On the left is a navigation menu with the following items: Device Info, Advanced Setup, Layer2 Interface, **WAN Service** (highlighted in red), LAN, NAT, Security, Parental Control, Quality of Service, Routing, DNS, DSL, UPnP, DNS Proxy, Interface Grouping, IPSec, Certificate, Multicast, Wireless, Voice, Diagnostics, Management, and Reboot. The main content area is titled "WAN Setup - Summary" and includes the instruction: "Make sure that the settings below match the settings provided by your ISP." Below this is a table with the following settings:

Connection Type:	PPPoE
NAT:	Enabled
Full Cone NAT:	Disabled
Firewall:	Enabled
IGMP Multicast:	Disabled
Quality Of Service:	Disabled

Below the table, there is a text instruction: "Click 'Apply/Save' to have this interface to be effective. Click 'Back' to make any modifications." At the bottom of the settings area, there are two buttons: "Back" and "Apply/Save". A blue arrow points to the "Apply/Save" button.

- Finally, complete the setup by clicking **Apply/Save**

You have successfully completed configuring your KW5262 VDSL Modem Router for your VMedia internet connection!
